Allowable Subject Matter

1. Claims 22-32 are pending.
2. The following is an examiner's statement of reasons for allowance:

The prior art of record fail to teach or fairly suggest fail to teach or fairly with respect to claim 22, a gripping device for a manipulation system having a detection system for detecting a workpiece received by the gripping means, and comprising at least one pulse emitter acting upon the workpiece to excite vibrations in the workpiece, and at least one vibration sensor for sensing the vibrations of the workpiece, and a memory and/or analytical module structured and arranged to conduct a vibration analysis on a vibration signal from said vibration sensor, wherein the detection system and the memory and/or analytical module jointly form a component part detachably arranged on the gripper head and in communication with a controller of the manufacturing plant via a bus system comprising an ASi bus; and with respect to claim 29, a method for feeding workpieces from a stack of workpieces to a metal sheet folding machine comprising the steps of recording signals from the vibration sensor in a memory and/or analytical module; and comparing a vibration spectrum of the workpiece stored in said module with reference vibration data; wherein the vibration sensor is applied to a surface of the workpiece by a contact pressure-exerting device, whereupon a pulse is applied to the workpiece by the pulse emitter with a contact time of about 200 ms for exciting vibrations in combination with the other elements and features of the claimed invention.
